To Students and Teachers

The expansion of the global economy and the development of information technology are making the world seem ever smaller and more immediate. In addition, the English language is no longer the possession of its native speakers, and is becoming an effective means of communication for those who use it as a second or foreign language. English is sure to play an ever greater role in the future as an auxiliary language used not only by native speakers but also by people throughout the world for exchanging information and building relations.

Given this situation, young people need to acquire basic English ability and an understanding of language-learning methods before they become full-fledged members of society. The acquisition of specialized knowledge and accumulated experience are necessary preparation for active participation in society, of course, but the importance of improved English ability cannot be overlooked.

This textbook has been designed to allow students to acquire strategies and ways of learning English through the activation of schemata. It is also a central objective of this textbook to promote the development of the students' whole personality and sense of identity in response to the enriching experience of otherness in the text. We hope that they will enjoy learning while expanding their knowledge of various topics.

Textbook Organization and Use

The textbook contains 14 units. Each unit is composed of three sections: Listening Practice, Reading and Writing Practice, and Preparation for the TOEIC® Test. Activities containing vocabulary and sentence structures that will activate schemata, and listening and reading activities that expand upon them are provided. Some activities of the book can be used as classroom activities and other parts as a supplementary text for self-directed study.

In the Listening Practice activities section students become familiar with methods for learning English as a spoken language through completing tasks provided.

The reading activities, which address a wide variety of topics, ask the students to read for comprehension, but they should also be encouraged to develop and express opinions about the content later in the Speaking/Writing activities. The Summarizing and Speaking/Writing sections can be assigned as homework, either checking the answers or having students give short speeches at the beginning of the next class.

The Preparation for the TOEIC® Test section can be used at the beginning or end of each class, or the sections from several units can be combined and done at the same time.

Features and Use of the CD

The conversation and reading sections are recorded on the CD. The conversation is read at normal speed, with background music and sound effects to give students training in listening for comprehension in the midst of background noise.

Listening Practice

Listen to the conversation and fill in the blanks. Then practice reading with a partner.

Amy: When I first saw Japanese money, I thought it looked like money from “Monopoly.” Maybe because it was very ______.
Masaharu: When I first saw a dollar ______, I thought it looked like play money too. Maybe all foreign money seems like that.
Amy: What’s worse is how a little piece of paper can mean so much. It causes ______, ______ ______, and even war!
Masaharu: It really does mean a lot. Money can ______ the world. Back to the ______ of bills... did you know that there is a special picture on a Japanese bill that you can only see when you hold it up to the light?
Amy: Oh, yes. That’s called a watermark. There’s one on American bills too.
Masaharu: Well, I’ll bet* you can’t tell me whose ______ is on a thousand yen bill.
Amy: And I’ll bet you can’t tell me whose picture is on a one dollar bill.
Masaharu: Uhhh… Abraham Lincoln?
Amy: Shōtoku Taishi?

*I’ll bet… = I’m almost certain that….

Listen to the CD and write the questions. Then listen to the conversation again and answer the questions.

### C  Let’s Read!

**“New Money” for Hawai’i**

In January 1942, one month after Pearl Harbor was attacked, the U.S. government nervously feared an enemy invasion. It decided to take action accordingly. One of the first steps taken was to create “New Money.” Planned for distribution in the summer of ’42, special notes imprinted with the word “Hawai’i” would become legal tender in the territory but would have no value outside of Hawai’i itself. This money was to consist of $1, $5, $10 and $20 denominations. Brown seals and serial numbers would replace the green and blue ones normally found on U.S. currency. The word “Hawai’i” would appear twice on the front of each bill and once in large letters across the back. The old money would no longer be legal tender in Hawai’i, and so would be collected and destroyed. However, due to citizen resistance, it took 27 months to
complete the change and to have the new money out in circulation. The government then put together a special committee to get rid of roughly 200 million dollars of old money. It was difficult to find a way to dispose of the enormous quantity of notes. After a few failed attempts to remove it, the money was finally hauled to a sugar cane mill on O'ahu and burned. Two hundred million dollars went up in smoke...but they say it had a very sweet smell! (227 words)
